

# GLUING APPLICATION

**KEYWORDS: DUAL-DRIVER, RECIPE STORAGE, PIPELINING**

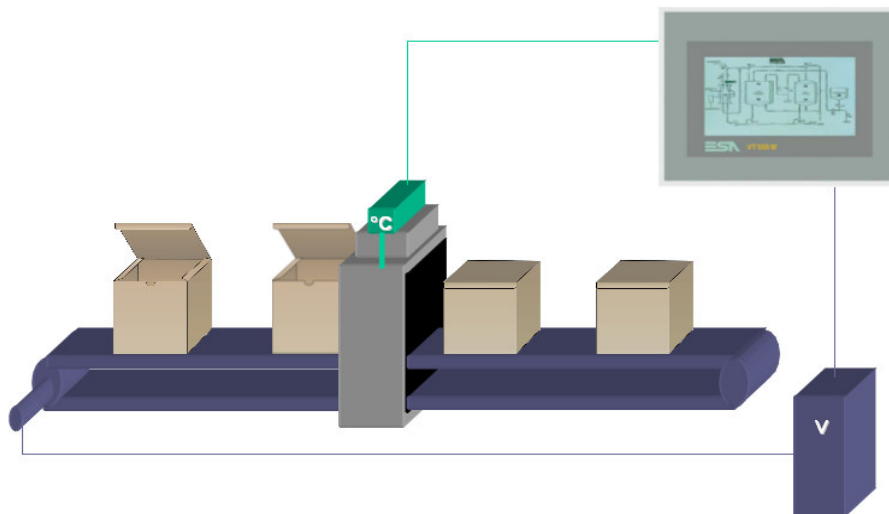

**THE APPLICATION:**

- A packaging is machine required to synchronize the speed of the conveyor with the temperature of the gluing machine

**ESA SOLUTION:**

- By using ESA the thermo regulator and the motion controller can exchange values. The terminal converts data automatically between different formats

**WHY ESA?**

- By using ESA the two systems can exchange values in Temperature and Speed converting automatically between different formats
- Only one entry point (HMI) for all the requested parameters
- Easy to use graphic touch screen display
