

VERTICAL DOSING MACHINE

KEYWORDS: DUAL-DRIVER, RECIPE STORAGE, PIPELINING

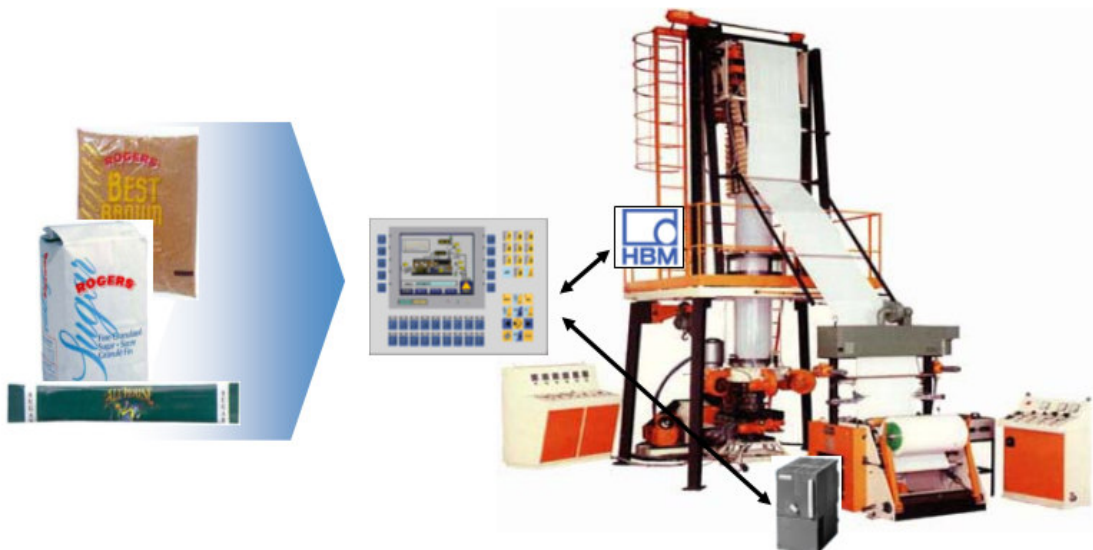

THE APPLICATION:

- Customer needs to synchronize the weighting system with the Automation PLC, and to handle the recipe for both systems.

ESA SOLUTION:

- A graphic terminal to store and download the recipes to the PLC and Weighting systems.
- The same HMI allows the weighting system and the PLC to exchange information in digital format

WHY ESA?

- ESA HMI features drivers to communicate with the weighting system
- ESA's double port and Pipeline features allow the two devices to communicate with each other and coordinate/share data.
- Recipe functions in the ESA HMI can be downloaded to the two different devices simultaneously
